

In the Specification:

Please delete paragraph 12 and insert therefor:

-- [0012] Applicants have designed a wellhead that overcomes these problems by providing an improved casing mandrel for securing components to an independent screwed wellhead. The improved casing mandrel is described in co-pending United States Patent Application Serial No. [] 10/440,795 entitled **CASING MANDREL WITH WELL STIMULATION TOOL AND TUBING HEAD SPOOL FOR USE WITH THE CASING MANDREL**, which was filed on May 19, 2003, the specification of which is incorporated herein by reference. However, the independent screwed wellheads such as the Larkin and Wellhead Inc. styles described above, which remain in wide use, do not accommodate secure connection of high pressure components for reasons described above. --
